Much has been said about the junk needs cleaning up and we want to have our say too.

We have trash and junk piles right inside our little town. It's not only unrightly to us and our visitors but a health hazard also. Old tires, buckets, damp rotting nets to name a few, hold water and breed mesquitos. West Nile disease is just one of the diseases these little pests can carry.

It de-valuates our properties when they see a junk pile next to our homes. It pollutes our streams. It harms our wild life. (I once saw a moose die from ingesting a plastic sack) Also junk can be a safety hazard as well.

We love Cordova. It's beautiful here and we believe that this awesome land is a gift from God our Heavenly Father. The junk cars and trash that scars this land is the same as spitting in his face. It's shameful and an embarrassment to us
